Experience

Studio Assistant

Mackinnon Watches

I specialize in crafting custom tartan straps, engraving watch backs, and imprinting leather straps. I am responsible for assembling watch straps with their faces, ensuring a seamless end product.

My role includes managing the entire order process, from intake to completion, while maintaining effective communication with the team through custom spreadsheets to track progress and streamline efficient team work. Additionally, I train new employees on processes, ensuring they are fully equipped to manage tasks with precision and efficiency.

Livingston (onsite)

July 2024 - current role

UI/UX Designer

Imosphere

I worked with the design lead and stakeholders across multiple product portfolios, leading projects from concept to mockup. Revamped the company website, managing and creating UI asset library.

Alongside my research and software design projects I collaborated with sales, marketing and development. I was responsible for producing marketing materials in support of investments and bringing on more customers.

Learnt and used skills in front-end development skills (HTML, CSS/Sass, Jekyll, Typescript, KnockoutJS) to assist marketing with website updates and the dev. team with front-end bug fixes.

Nottingham (remote)

April 2022 - July 2023

Freelance design

Contracts

Career Foundry

April 2021 - January 2022

BA (Hons) Fashion Design

Heriot-Watt University

2015 - 2019

Extra

2021

Adobe Creative Jam

I have taken part in two UX Adobe mobile app design competitions with a teammate to create apps catered for kids. An app to encourage reading through a Scholastic event and another app to help teach kids about space through a gamified app. We managed to win 1 year free of creative cloud apps after designing and prototyping with a week deadline.

Leung Design

May 2020-present

Started Etsy selling line illustrations with a lot of competition on the site, I grew my store to over 80 sales within the first 6 months. I keep it going on the side!
